Certification of Biorisk Management Professionals

A large, circular, blue-tinted microscopic image of a virus particle, showing its surface and protruding spikes, occupies the left side of the slide.

Certification Program

Ensuring Quality Biorisk Management Through Certification of Professionals

A not-for-profit non-governmental organization, the International Federation of Biosafety Associations (IFBA) manages global biological risks through a standardized measurement of competency and certification of professionals in the following technical disciplines:

- **Biorisk Management**
- **Biological Risk Assessment**
- **Biological Waste Management**
- **Biocontainment Facility Design, Operations & Maintenance**
- **Biosecurity**
- **Biosafety Cabinet Selection, Installation & Safe Use**
- **Cyberbiosecurity**

For further information please visit www.InternationalBiosafety.org

A faint, light-colored logo of the International Federation of Biosafety Associations (IFBA) is visible in the bottom right corner. It features a central shield-like emblem with a balance scale and a ribbon, flanked by stylized leaves.
