

CALL FOR ABSTRACTS

Conference Theme: The Future of Containment – Thinking Outside the ‘Facility’

Abstracts are now invited for topics related to biosafety and biosecurity implications of the following:

- Food and nutritional security (running field trials; increasing production and availability; facilitating access; supply chain integrity and stability; alternative foods; evolution, and release of gene edited products; assessing and managing risks and threats).
- Public and/or personalised healthcare (clinical trials, including manufacturing and logistics; bio-risk management; designing health translation facilities; clean room, nanotechnology and pharmaceutical containment facilities).
- Building robust governance and best practice frameworks (principles of biosafety and biosecurity; legislation and standards; ethical considerations; pathways to market; emerging tools and practices; responding to new or emerging requirements; adapting to new threats).
- Reducing and mitigating climate change (Net zero buildings; containment facility design; renewable energy integration; sustainable resource and consumables management; adapting to climate challenges).
- Ensuring environmental sustainability (protecting endangered or significant flora and fauna; managing invasive species; intentional release of biohazards; protection of genetic resources).

**ABSTRACT
SUBMISSIONS OPEN**

**DEADLINE FOR SUBMISSION
FRIDAY 24TH MAY 2024**

Scholarship Opportunities available
